

Banking Website Features

1. Accessible Voice Read-Out :

This feature helps blind and low-vision users use your banking website easily.

When the user **moves the mouse on any text** (hover) or presses the website will **speak that text automatically**.

Supports multiple languages including Hindi, English, Marathi.

2. Adaptive Text Size Control:

This feature allows users to **increase or decrease the text size** on your banking website.

3. Readable URLs:

Helpful for Blind & Visually Impaired Users. Screen readers the URL. If the URL is confusing, they don't understand.

4. Emergency Notice Bar:

An **Emergency Notice Bar** is a **small message bar** that appears at the top of your website when something important or urgent needs to be told to customers.

When banking services are not working because the server is down. Important notices from the Reserve Bank of India.

5. Fraud Awareness Section:

A **Fraud Awareness Section** is a dedicated part of your banking website that teaches customers how to stay safe from online fraud and cybercrime. Cybercrime Safety Tips, RBI-Mandated "Safe Banking Practices"

6. Keyboard Navigation:

Blind users and people with motor disabilities cannot use a mouse. They use keyboard keys to move around your website.

7. About Us:

The **About Us** section tells customers who the bank is, what it stands for, and why customers can trust it. Bank History, Management Team, Vision & Mission, Milestones.
